AIRCRAFT MAINTENANCE ENGINEER(AME)

The Aircraft Maintenance Engineer (AME) is a full time position, working 40 hour work weeks.

FUNCTION

The Aircraft Maintenance Engineer is to inspect and perform maintenance on the company and third party aircraft. Tasks vary from line maintenance to heavy maintenance on piston, turbine, airframe and accessories. Perform work that adheres to manufacturer's recommendations, regulatory requirements, company policies and procedures.

WORK ENVIRONMENT

The work is mostly within a controlled environment in the hangar or on the company ramp. On Occasion, work will be required outdoors, even in harsh conditions. Must be able to work night shifts with summer schedule being mainly night shift. The AME must be able to adapt to sudden changes, make sound judgements and decisions.

WORK EXPECTATIONS

- Complete all work orders, check sheets and records accurately and in accordance with regulatory procedures and/or manuals
- Ability to work in a team setting, but also complete projects on a unsupervised individual basis
- Have strong time management and organizational skills
- Showcase consistent technical aptitude
- Maintain an organized, clean, and safe working environment

QUALIFICATIONS

In order to qualify for this position the applicant must meet the following criteria:

- Must possess Transport Canada M1, M2, or S License or combination
- Preferably with experience working on Cessna, Beechcraft and Piper (C172, C206, C208A, C208B, B1900C, PA31, PA34) or similar
- Must be legally able to work in Canada
- Have a valid class 5 driver's license
- Be computer literate
- Comprehend and Communicate proficiently in English
- Be dexterous and able to lift a minimum of 50 lbs
- Have their own transportation/tools excluding specialized tools

ADDITIONAL TRAINING

Applicant will receive internal training on the following:

- Commercial Equipment
- Globally Harmonized System (GHS)
